

Project Manager

Kathmandu, Nepal · +977-9810541250 · parajulismita55@gmail.com · [linkedin.com/in/smitaparajuli/](https://www.linkedin.com/in/smitaparajuli/)

Analytical and detail-oriented Project Manager with a strong foundation in modern frontend architecture and quality assurance workflows. Proven track record in orchestrating sprint activities, translating business vision into actionable functional requirements, and maintaining clear communication channels between developers and clients. Combines a technical developer mindset with structured project delivery methodologies to optimize workflow efficiency, mitigate execution risks, and deliver client-aligned digital solutions.

SKILLS & EXPERTISE

Project & Sprint Delivery: Agile Frameworks, Scrum Implementation, Project Planning, Scope Management, Requirement Gathering, Traceability Matrices, Task Coordination, Risk Mitigation

Stakeholder & Client Relations: Business Requirements Translation, Progress Reporting, Cross-Functional Collaboration, Defect Resolution Alignment, Feature Validation

Quality & Process Control: Test Strategy Planning, Functional Testing, Regression Validation, Bug Lifecycle Management, User Acceptance Testing Support

Technical & Tooling: Next.js, React.js, JavaScript, Tailwind CSS, SQL Data Validation, Postman, Jira, GitHub Projects, Figma

PROFESSIONAL EXPERIENCE & PROJECTS

Web Designer & Project Coordinator | Thulo.com

Sept 2025 – July 2026

- Serve as the central communication bridge between clients, design teams, and development units to ensure technical deliverables match client expectations.
- Streamline sprint workflows by clarifying ambiguous business requirements, prioritizing backlogs, and providing regular progress updates to stakeholders.
- Conduct comprehensive functional and visual quality checks across browser environments to ensure high standards before client delivery.
- Systematize defect tracking by logging technical issues, assigning ownership, and following through to resolution to maintain release timelines.

QA & Project Manager | Healthcare Patient Portal (CedarCare)

April 2026

GitHub: [CedarCare](#)

- Tech Stack: HTML5, CSS3, JavaScript, SQL, Manual Testing Suites
- Spearheaded the translation of complex healthcare business needs into precise functional requirement documentation and test scenarios.
- Designed and executed Requirement Traceability Matrices to track feature progress, defect resolution, and delivery readiness.
- Performed SQL-based database verifications to validate data accuracy and optimize backend user flow logic.

Frontend & Project Coordinator | BajarKart (E-Commerce MVP)

July 2025

Live Site: [BajarKart](#) || GitHub: [GitHub - BajarKart](#)

- Tech Stack: Next.js, React.js, Tailwind CSS, Clerk, Inngest, MongoDB
- Coordinated end-to-end MVP delivery by managing developer sprint tasks, tracking milestone progression, and removing workflow blockers.
- Established structured GitHub project boards to improve team velocity and streamline code review processes.
- Validated user stories against client specs prior to production releases, ensuring zero critical issues upon launch.

Frontend & QA | CineExplorer

June 2025

Live Site: [CineExplorer](#) || GitHub: [GitHub - CineExplorer](#)

- Tech Stack: React.js, Vite, TMDB API, Context API, CSS Modules
- Conducted continuous product assessments to identify usability bottlenecks and propose interface optimizations.
- Facilitated feedback loops between end users and developers to refine application features prior to final release.

Web Developer Intern | Municipality Office, Belbari, Morang

Jan 2024 – Mar 2024

GitHub: [OnlineFormMunicipal](#)

- Tech Stack: PHP, MySQL, HTML, CSS, JavaScript
- Engaged directly with municipal stakeholders to map operational requirements into digital service solutions.
- Maintained underlying MySQL database structures while validating system outputs for public service applications.

EDUCATION

Vishwa Adarsha College - Itahari, Nepal - 2024 - Bachelors in Computer Application
